

➤ 230-Series Numerical Scoreboards

- The 205 Series scoreboards are available in two different models. One larger two line scoreboard with 18 digits and one smaller version with one line and 6 digits.

Both scoreboards can be upgraded with a radio module to be controlled wirelessly or otherwise controlled via cable.

The scoreboard has extra strong LEDs and an anti reflex glass which makes it easy to see even in bright sunlight. Together with a light sensor it adapts the strength of the LEDs to the ambient light so that it even provides good contrast even when used indoors.

The scoreboards can also be equipped with a temperature sensor to display temperature.

The scoreboards are fully compatible with the ATU-X wireless timekeeping system.

6 & 18 digit scoreboards

Technical Specification 18 Digit Scoreboard

Dimensions	1760 x 600 x 90mm	Digit Height	230mm
Weight	18Kg	Viewing Distance	100 M
Power Consumption	300 W (max)	Signal	Serial RS422
Voltage	230 V / 50Hz		

Technical Specification 6 Digit Scoreboard

Dimensions	1010 x 315 x 100mm	Digit Height	230mm
Weight	7Kg	Viewing Distance	100 M
Power Consumption	100 W (max)	Signal	Serial RS422
Voltage	230 V / 50Hz
